

## Measuring Clergy Time

Clergy “work time” is measured in units.

One day consists of 3 possible working units – morning, noon, night  
(the assumption is overnight is meant sleep time).

One unit equals approximately 4 hours

### **Clergy Time:**

100% Full time = 10 units per week or approximately 40 hours per week

75% time = 7.5 units per week = approximately 30 -35 hours per week

50% time = 5 units per week = approximately 20 – 25 hours per week

25% time = 2.5 units per week = approximately 10 – 12 hours per week
